SREEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTI-CURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA CINTMENT, for preserving, purifying, and beautifying the skin, for cleaning the scale of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rushes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA Soar in the form of baths for annoying irritations, inflammations, and exceriations, for too free or offensive perspiration, in the form of washes for alcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED, Are a new, lasteless, odourless, economical substitute for the celebrated liquid Curiousa RESOLVENT, as well as for all other blood puilflers and humour cures. Put up in screw-

cap pocket visis containing 60 doses. Curiculta Pills are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin partiers, humour cares, and tonk-digestives, yet compounded. CHINESE RAILWAYS.

The Peking correspondent of The Times relegraphs that the final contract for the Anglo German Tientsin-Chin-kiang trunk railway has now been drafted by the British and Chinese Corporation and the Deutsch-Asiatische Bank, and will shortly be formally laid before the Chinese Government. Count von Billow's just ructions to Baron Mumm von Schwarzenstein, communicated to the Wai-wu-pu, are that Germany will decline to open commercial treaty negotiations as provided by the protocol of 1901 until the final contract for this railway has been signed. The preliminary contract provided for a loan of £7,400,000 of which two thirds was to be German and one third British. The final contract changes the terminus to Pu-kou, opposite Nanking, and increases the loan to £10,000,000, of which £6,500,000 is to be German, and £3,500,000 British, the whole to be secured on the railway, and to bear interest at D per cent., guaranteed by the Chinese Government. The reilway, which is to be under foreign management, will join the line from Tientain to Tal-nan-fo, the capital of Shan-tung, and then run from Tsi-man-fu to the southern border of the province, where the British section will continue to the Yangtsze in the hope of creating a trade between Shantung and the

Recent experience gained in a journey. through the province convinces me of the anxiety with which Chinese offcials witness the assistance rendered by England to the development of German policy in Shantung. The policy of Russia in Manchuria is being repeated by Germany in Shantung, England being deceived by Count von Bülow as she was formerly deceived by Count Muravieff. The exclusive right to construct a system of milways in the province, which Germany, with the approval of England, acquired in 1898, carrieswith it the right to a mining monopoly for 10 miles on each side of all the railways. Deeming even this insufficient, on Dec. 15 last, Baron Mumm von Schwarzenstein presented four additional demands to the Wai-wu-pu, the third of which was that within two years of the date; of the opening by Germany of any mino within this area all Chinese mines already open within a distance of five miles of German mines should be required to suspend operations, the effect being to increase the German monopoly from 10miles to 16 miles on each side of the railway, Article 17 of the Shan'ung mining regulations, signed by Germany and China on March 21, 1900, which provides that within a distance of 10 miles on each side 1262 of the railway only Germans and Chinese shall be permitted to open miner, stipulates that in the case of mines ulready being worked the Chinese may be permitted to continuo working. Germany now claims TURKISH TOBACCO. Our EGYP, that these words mean that Chinese may continue working according to old methods to inform the Public of Hongkong that he thom as First-case Smokes. We receive only, and are excluded from adopting machinery or methods which can enable them to compete against Germang. China profests against this interpretati n. which the Gormans demand shall apply not only to the area slong the railway but to five additional mining zones, covering practically the whole remaining mining area, of a

ECNGRONG, SATURDAY, MAY 6, 1905. RELIGION IN RUSSIA It would appear as if the blood of the Russian pensants, poured forth liberally on the fatal Sunday, at which the civilized world stood aghast, not be, after all, absolutely fruitless. "It has been proved more than once that the supporters of oppression and suppression, are prepared to go to great lengths to retain their authority, but they hesitate when they perceive that those over whom they hold the iron sceptre, and on whose necks they press the ironshed boot, are prepared to resist their tyrants, at the cost of their own hearts' blood. The imperial Ukases, remitting government loans, and granting religious equality, are without doubt concessions made to an enraged if not sullen people, which would have never been placed within their reach, had not the martyrs shed their warm blood on the cold snow in order to show the 2 p.m.—Auction of Japanese Curios and fixity of their determination, and depth many of them appear to have espoused. 3 p.m.-Auction of Crown Land at the The fact, however, that government which recalls the condition of

The day has quite sunk beneath the horizon of our vision, and is nothing more than a memory, when our fellowman, be he king or archbishop, would dare to direct what we should believe, or how we should worship, or, for that matter, whether we should worship at all. The 'Cullinan' Diamond.

South Africa's largest diamond, the pearance is particularly imposing, for defent valued at over one million sterling. The · Excelsior ' diamond, which held the record for size until the discovery of the 'Cullinan.' is quite dwarfed. In height the wherewith to rid the hulls of their incum-'Cullinan' stands about two inches-its brances, the later reports have been somebreadth being rather more. There are what misleading. several flaws noticeable, but these, according to expert opinion, are only on the surface. It is anticipated that it will be possible to cut one stone of twelve or thirteen hundred carats from it. The directors of the Premier (Transvant) Diamond Mining Pending the issue of an exequator Company, to which it belongs, are as yet undecided as to what its ultimate fate will be. In its present form its value from the market point of view is too febulous to bring it within commercial computation.

Women as Jurors. There are such delightful confusion and in consequence in the argument of a letter published by the Daily Telegraph in favour of the admission of women to the jury box as betray most ingenuously the sex of the writer. The correspondent discovers suitable precedent in the case of Pilate's wife! The letter indecd affords a beautiful example of the manner in which the superior sex are wont to arrive at conclusion. 'She had, perhaps, not heard the false evidence by which the spotless was condemned or any timid plea from his advocates; but she came out on the right side The usual prayer meeting will be held of truth by such an illogical and womanly process as, suffering many things in a dream. Russia and Turkestan. The St. Petersburg correspondent the Golds wrote on April 4 :- Turkestan seems likely to attract a great deal of attention on the part of the authorities. It is announced officially that a special expedition will set out for Russian Centra Asia during the coming summer with the object of exploring and studying the region from every point of view, Owing Russia's overthrow in Manchuria, the question of Russia's advance enstwards' across Eastern Turkestan comes once more naturally to the front. This all the more so now, seeing that the Orenburg and Tashkend Railway is in operation and that the laying down of the Tomsk and Tashkend Railway is a project that, when it is carried out, will give Russia a third strategic line of railway for carrying troops to Tashkend, or to the eastern terminus of the Russian railway system in Central Asia. State of the Hulls.

It will be remembered that when the Baltic fleet was first reported from Singapore it was stated that the bulls were in a frightfully foul candition, being covered with seaweed. Later advices, however, failed to confirm that statement. In-fact, exactly the reverse was reported. By the last English mail we note that the Paris correspondent of The Times wrote, towards the end of March, that information had gascar the bottoms of the ships had become their speed had diminished by nearly two knots. If they had kept the sea the ships

would have cleaned themselves more or less in bad weather, but they were seven weeks hanging about in harbour at Madagascar. It is believed that Admiral Rozhdestvensky is making a tremendous bend to the south in order to avoid the Japanese and to gat into cooler water, which will clean his ships. His eventual destination is said to

matter of fact, the original report from Singapore was indeed true, and that unless Admiral Rozhdestvensky has means at hand

There were not many arrivals in the harbour during the day and none of the ships that did come in had seen anything of the Baltic fleet. The only boat that had any news was the "Haiching" from Swatow. Captain Hodgins reported that on the 4th at about 5,40 p.m. he sighted five steamers,

which he took to be battleships. The ships were about 20 miles north of Amoy and they were without lights and were not ateaming. It was getting dark at the time so that they could not be at all distinctly made out;

TO RAISE THE "SULLY."

The Pontoon Launched.

The pontoon, with which it is hoped to re-float the stranded French cruiser "Sully," was successfully launched at the Kowloon Docks this morning. As it took the water it looked a rather ungainly object but its construction necessitated it being something in the shape of large case having a portion cut awy to fig under the stranded vessel. Undoubtedly, it is the first piece of work of the kind that has been turned out in Hongkong and the Dock Company is to be congratulated upon the expeditious manner in which its construct on has been carried out. In building it about 500 men have been constantly employed and about 200,000 feet of timbor used. The displacement of the pontron is 4,500 tone, which, it is calculated, will give a lifting power sufficient to raise the cruiser off the pinnacle of rock on which she fixed. The dimensions of the structur are, length 106 feet, height 35 feet, greatest width 80 feet. It is made so as to fit under the fore part of the cruiser when submerged and four large tanks with which it is THE young Paris girl who was carried off a fitted will then be pumped out in order give it the necessary lifting power.

What all this means, when fighting against an ecclesiastical authority, buttressed by the throne, to those, who in the face of opposition, have dared, either in public or private, to think for themselves, we can easily imagine, by recalling a similar condition of things in our own country in bye-gone days. But even now has the concession been made too tardily? Macaulay, in one of his essays, in which he deals with the unconscionable arrogance of Charles I., remarks, in effect, that the Stuart King never made a concession till he saw that if it were not given, the people would wrench it from his grasp, and then, the thing-granted, would be of little value towards conciliation. THE NATIONAL BANK OF CHINA.

In the Court of Appeal on 6th inst. beore Lords Justices Vaughan Williams, National Bank of China, was heard on the appeal of 44 holders of the founders shares n the company from a judgment of Mr sanctioning a scheme for the reduction of the capital of the company, the facts concerning which were reported by us at the time. The appellants opposed the petition a breach of the bargain between the company and the holders of founders' shares. as contained in the articles of association. and that, in the circumstance, to wipe out the founders shares altogether was unfair and inequitable. Mr Justice Farwell, being of opinion that the scheme would do no injustice, sanctioned it. Hence the present appeal. The hearing was adjourned.

Mr Upjohn, K.C., for the respondents. intention of the Company to do otherwise. to estisfy the Court the Company would give an undertaking not to apply any park of the reserve fund, which was left after that which was mentioned in the netition. for the purposes of dividend. Lord Justice Vaughan Williams, in giv-

Ing judgment, said that Mr Justice Farwell was satisfied in this case as to two propositions. First, he was satisfied that in the state of things which existed at the time when the patition was presented the prospects of the founder shareholders get ting any return was so remote that he thought he was doing no injustife to them to treat their interests as being of no substantial value. The next question was as to whether the loss had been really proved. There was, however, yet another question, as to whether, in effect, the present scheme did not hand over to the shareholders in the bank a sum of money which might certainly have been treated, if it had been though fit, as part of the capital of the bank, and therefore available as security for creditors. In such a matter the Judge who heard the petition had to be satisfied, and, if satisfied that court ought not lightly to interfere. Under the circumstances, he was not prepared to say that Mr Justice Farwell's decision was wrong, and the appeal would

be dismissed. The other Lords Justices concurred. Mr Kirby, on behalf of the company, stated that the undertaking which had been referred to would be that the company would not apply for any purpose other than capital purposes any part of the reserve fund which was left after that which was applied by the petition. The appeal was accordingly, subject to this undertaking, dismissed.

WONDERFUL DISCOVERY. This is theage of research and experiment, why n all nature, so to speak, is ransacked by the scientific for the comfort and happiness of man. Science has indeed made giant strides during the past century. and among the-by no means least importantdiscoveries in medicine comes that of Therapion, particulars of which will be found in another column. This preparation is unquestionably one of the most genuine and reliable Patent Medicines everintroduced, and has, we understand; been used in the Continental Hospitals, by Ricord, Rostan, Johert, Velpeau, Msisonneave, the well-known Chussaiguac, and indeed by all those who are regarded as authorities in such matters, including the celebrated Lallemand, and Rour, by whom it

was some time since uniformly adopted, and that it is worthy the attention of those who require such a remedy we think there is no doubt. From the time of Avistotle downwards, a potent agent in the time of Aristotle downwards, a potent agent in the removal of these diseases has (like the inmed philosopher's stone) been the object of search of some hopeful, generous minds; and far beyond the mere power—if such couldever have been discovered—of transmuting the baser metals juto gold is sarely the discovery of a remedy so potent as to repletish the failing energies of the comfinmed roud in the one case, and in the other so effectively, speedily and safely to expel from the system without the aid, or even the knowledge, of a second party, the poisons of acquired or inherited disease in all their protean forms as to leave no taipt or trace behind. Such is The New French Remedy Theraplon, which may certainly rank with, if not take precedence of, many of the discoverles of our day, about which may certainly rank with, if not take precedence of many of the discoveries of our day, about which no little estentation and noise have been made, and the extensive and ever-increasing demand that has been created for this medicine wherever introduced appears to prove that it is destined to cost into oblivion all those questionable remedica that were formerly the sole reliance of medical men, were formerly the sole reliance of medical men. Therapion may be obtained in England, direct from the proprietor, and of the principal Chemists and Merchants throughout the Colonies, India, and Merchants throughout the Colonies, India, China, Ikpan, &c., not even excluding such remote districts at Central Africa, the Piji Islands, St. Helens, &c., Dismond Fulding system Krampurger.
